PROFILE

As a dedicated Python Django Developer, I thrive in the dynamic realm of creating, executing, and managing robust online web applications. My expertise extends to crafting custom Python code that elevates the functionality of Django applications, ensuring a seamless user experience. With the understanding of Frontend technologies.

PROFESSIONAL EXPERIENCE

Backend Developer Intern @ Techritzy Pvt Ltd   **July 2023 - Present**

- Contributed to the design and implementation of web applications using Python and Django.
- Conducted a comprehensive data extraction from an online job platform, specifically scraped useful data from naukri.com. Gathered and analyzed job data from multiple domains.
- Developed a Cloud Kitchen Website using Front-end technologies.
- Managed MySQL database operations, including schema design, implementation, configuration, and table normalization, ensuring optimal performance and reliability.
- Taken part in the entire lifecycle of the software development project including design, development, testing, implementation, deployment, and support.
- Conducted industrial training sessions for new employees(Newbies) at Techritzy Pvt Ltd, specializing in Python concepts.

INTEREST

- Linux, Bash, Full-Stack Development (Django, MySQL), Automation script (Python), Web Scraping

PROJECTS

- **AI-Based Data Genesis System:** This project is a data generation and database management system that leverages the Eden AI API to create realistic data and manage databases seamlessly. (Source Code).
- **Naukri Web-Scraper:** Implemented a web scraping project to extract valuable data from the Naukri.com job portal across multiple job domains (Source Code).
- **Database-Populator:** It is a Python-based automation project designed for efficiently populating databases with random data using Python and the Faker module. (Source Code).
- **Google-Chrome-Extension:** "Reminder-Plugin" is a Chrome extension that allows users to set, organize, and receive timely reminders for better task management. (Source Code).
- **Air Canva on White Board:** This project presents a real-time video-based pointing method that allows sketching and writing text over the air in front of a camera, It can be used in Online Teaching and Training. (Source Code).

SKILLS

- **Programming-** Python, Bash
- **Web Technologies-** Django, Flask, HTML, CSS, JavaScript, Bootstrap
- **Database-** MySQL, MongoDB
- **Version Control-** Git, GitHub
- **Cloud-** AWS
- **Operating System-** Linux, Windows
- **Website Builder-** WordPress, Google Sites
- **Visualization Tool-** Tableau
- **Research, Teaching**
- **Language-** English, Hindi

EDUCATION & ACHIVEMENTS

- **International Institute of Professional Studies, Devi Ahilya University, Indore**
  Master of Computer Application(5 Years)
  CGPA - 8.7/10   **Dec 2020 - Present**
- **Tirathbai Kalachand School, Indore**
  Class 12th PCM, Percentage - 79%
  Class 10th, Percentage - 85%
- **International Conference** on Innovation and Challenges in Engineering Sciences (ICICES) Presented my research paper (Topic- NRWI & PaperID- R22)   **March 2023**
- **National Basketball Player and Sports enthusiast**
